# The Tokyo 2020 Games and Osaka-Kansai Expo 2025 from Youth Perspective on Sustainability

Organizer : Climate Youth Japan

<https://www.nippon.com/ja/japan-topics/g00795/>

<https://www.nippon.com/ja/japan-topics/g00795/>

## About Us

# Climate Youth Japan

- Founded in 2010 by the Japanese youth who participated in **COP** (Conference of the Parties to the United Nations Framework Convention on Climate Change)
- Consists of over 90 students from all over Japan who are highly interested in climate change, which will have **a great impact on the future generation.**
- Engage to educate young people about climate change issues and **cooperate with ministries, agencies, and companies**, in order to achieve an intergenerational equitable and sustainable society.
- Have sent a total of more than **50** young people to the **COP** since the foundation.

### Our Vision

Lead the way in solving climate change to create an equitable and sustainable society

### Our Goal

Be involved in the decision-making process of society to achieve the Paris Agreement

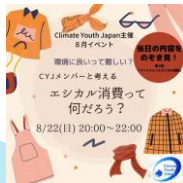

### Our Purpose

Promote initiatives to solve the problem of climate change from Japanese youth

# About Us Overview

▪ **Compost PJ**  
The practice of making  
compost from waste

▪ **Plant-based PJ**  
Drawing up the way for more  
people to practice plant base

## External Events

- **Climate change × country area**  
Discussion with various people on the Internet
- **Smart city × SDGs**  
The relationship between urban development and SDGs
- **What is ethical consumption?**  
Think about our familiar ethical consumption

## Other

- **CYJ Power**  
Promotion of the process of installing solar panels on school or people around us
- **Tour of Fukushima Nuclear Power Plant**  
Inspection of nuclear facilities and exchange of views with staff

## Group research

Every week activity for  
environmental issues

## Group study sessions

## Policy Proposal

- **Policy recommendations to ministries and agencies**  
Introduce of renewable energy create opportunity among citizens
- **Attend hearings of the Majority Party**  
Appeal to set the ambitious goal in the 2050 future

## Overseas business

- **Dispatch to COP**  
Dispatches annually to disseminate information as Japanese youth
- **LCOY/COY**  
Discussions with young people from around the world at the Local Conference of Youth
- **Climate Score Card**

# Agenda

JYC 日本若者協議会

1 – **CYJ** opening statement & introduction of our organization

2 – **CYJ** overview of the Tokyo 2020 Games

3 – **JYPS** Questionnaire survey on Tokyo 2020 Games and Osaka-Kansai Expo

4 – **FFFJ** opinion about the Tokyo 2020 Games

5 – **JYC** opinion about the Tokyo 2020 Games

6 – **CYJ** comments and overview of the Osaka-Kansai Expo 2025

7 – **FFFJ** opinion about the Osaka-Kansai Expo 2025

8 – **JYC** opinion about the Osaka-Kansai Expo 2025

9 – **CYJ** opinion about the Osaka-Kansai Expo 2025 with SWITCH

10 – **CYJ** overall comment about the next steps

※ No Q&A part

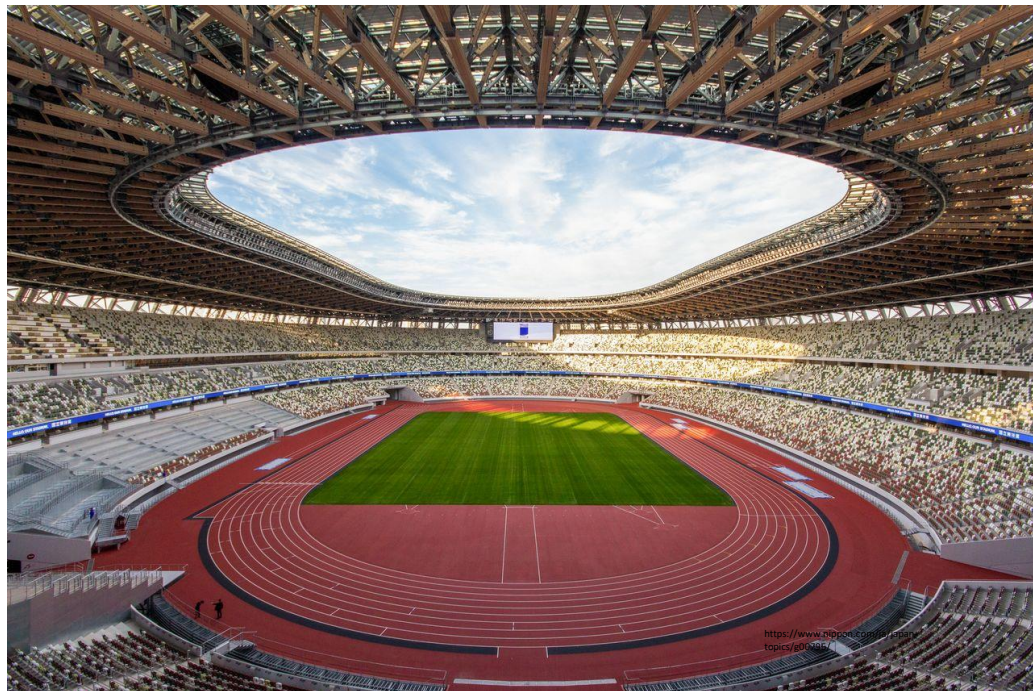

# Let's talk about the Tokyo 2020 Games from youth perspective!!

2 – **CYJ** overview of the Tokyo 2020 Games

3 – **JYPS** Questionnaire survey on Tokyo 2020 Games and Osaka-Kansai Expo 2025

4 – **FFFJ** opinion about the Tokyo 2020 Games

5 – **JYC** opinion about the Tokyo 2020 Games

# *The Tokyo 2020 Games from Perspective on Sustainability*

Presenter : Climate Youth Japan

# Environment integrated in “Olympism”

## 3 dimensions of “Olympism”

### Sports

### Culture

### Environment

# Sustainalympics concept

Sustainalympics is **making a youth legacy** where we

1. Make a legacy in the **soft area** (culture, education etc.)
2. Display our **future visions**  
for the world to see.
3. Make what we want **real**

# Sustainalympics youth projects

Support each other's projects by coopertion

# 1 – Positive Points for the Tokyo 2020 games

Carbon Negative

Diverse Participants

Resource Recycling

Forest Certification

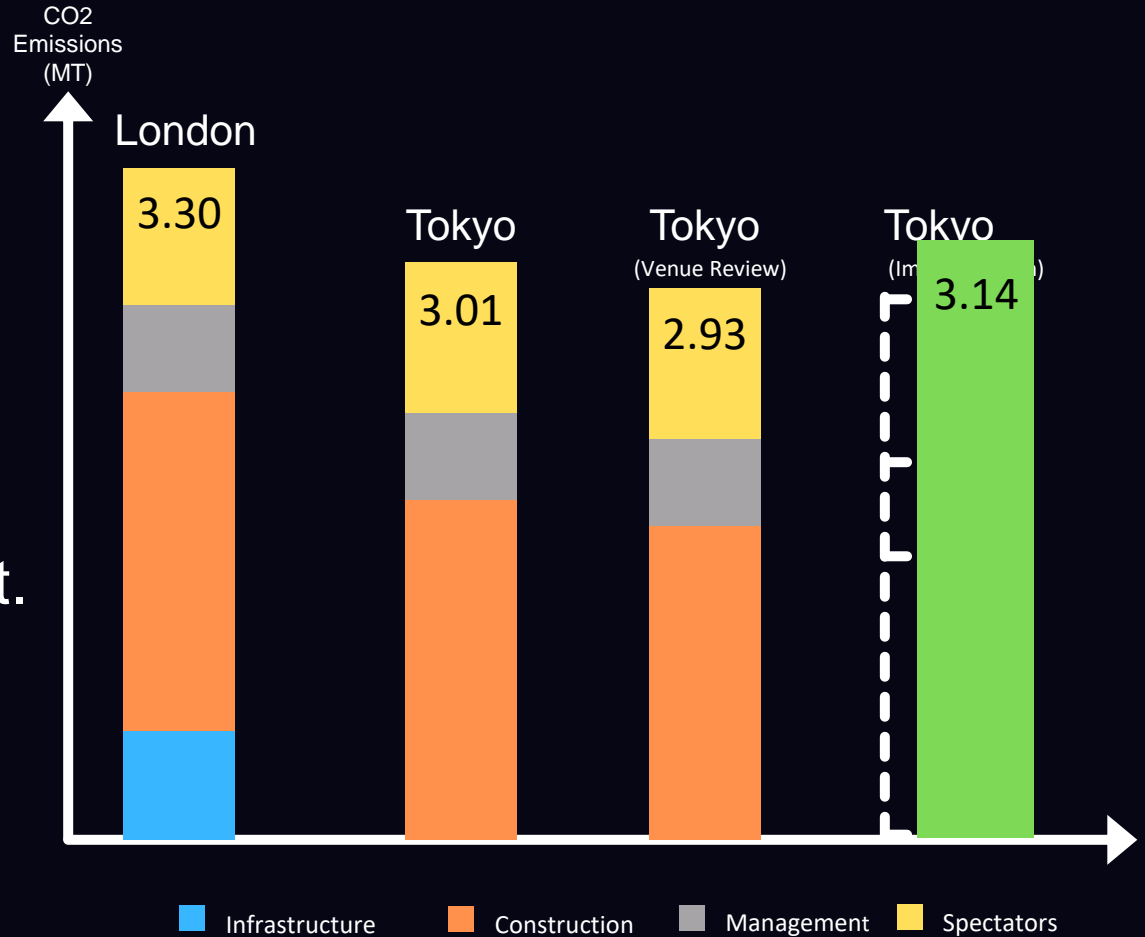

1 – Positive Points for the Tokyo 2020 games

Carbon Negative

Tokyo 2020 games  
was the first ever to  
be held in a carbon-  
negative environment.

1 – Positive Points for the Tokyo 2020 games

Diverse Participants

Abundance of official related events for everyone, many companies and regions

CYJ held the Eco-friendly Candle Night Relay in Kyoto as an official event related to the Tokyo 2020 Games

## 1 – Positive Points for the Tokyo 2020 games

### Resource Recycling

Achieved producing all the medals with recycled materials collected from all over Japan.

The Olympic podium, a total of 98 units were made from 24.5 tons of recycled plastic

## Resource Recycling

Tokyo 2020 games aimed for a 65% reuse/recycle rate by thoroughly separating waste during operation.

A green recruitment poster for Tokyo 2020 sorting navigators. At the top left is the Tokyo 2020 logo (東京都). At the top right are the Tokyo 2020 Olympic and Paralympic logos (TOKYO 2020 and TOKYO 2020 HOST CITY). The main text reads '東京2020オリンピック・パラリンピック' (Tokyo 2020 Olympic and Paralympic) and 'ごみ資源の「分別ナビゲーター」募集' (Recruitment of Waste Resource Sorting Navigators). Below the text are two photos: one showing a group of people in orange vests sorting waste, and another showing a person in a green vest sorting waste. A yellow box on the right says '2021年5月31日まで登録受付中' (Registration accepted until May 31, 2021). At the bottom right is a URL: <http://www.pp.u-tokyo.ac.jp/wp-content/uploads/2021/05/d928dc2d27e1451bf2b556273c710e7.pdf>.

↑sorting navigators had planned to be recruited at Tokyo 2020 games.

1 – Positive Points for the Tokyo 2020 games

Forest Certification

Dissemination of  
the forest  
certification  
system to all  
prefectures

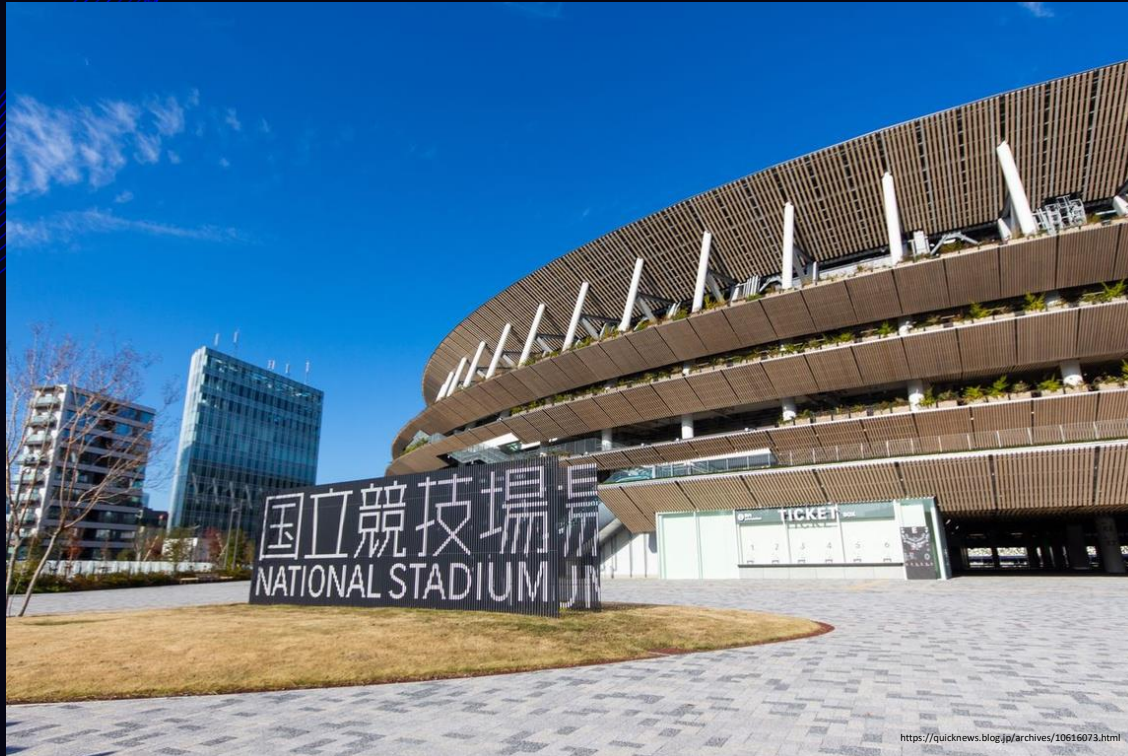

1 – Positive Points for the Tokyo 2020 games

Forest Certification

<https://quicknews.blog.jp/archives/10616073.html>

<https://fr.fsc.org/>

持続可能な  
森林管理の促進  
[www.pefcasia.org](http://www.pefcasia.org)

<https://pefc.org/>

## 2 –Negative points for the Tokyo 2020 games and some solutions

### Information

Lack of Diffusion of Information about Sustainability

### Construction

Unsustainable redevelopment of the New National Stadium and its periphery

### Resources

Unsustainability of resources from procurement to disposal

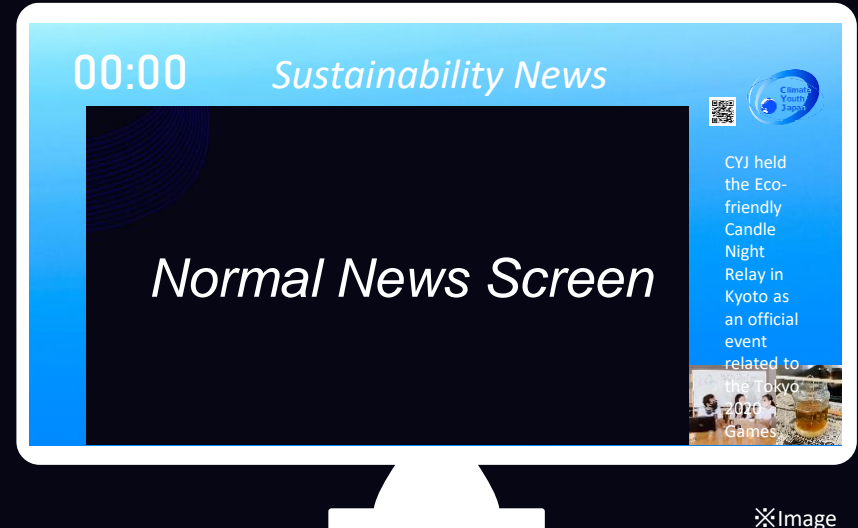

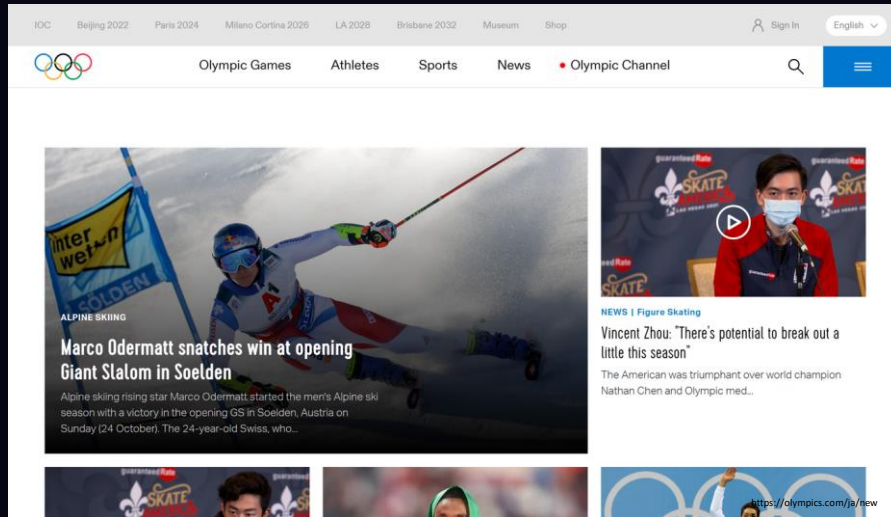

## 2 –Negative points for the Tokyo 2020 games and some solutions

### Information

### Lack of Diffusion of Information about Sustainability

the Tokyo 2020 committee should have launched a website where people can easily access and see their sustainable actions visualized by field.

## Construction

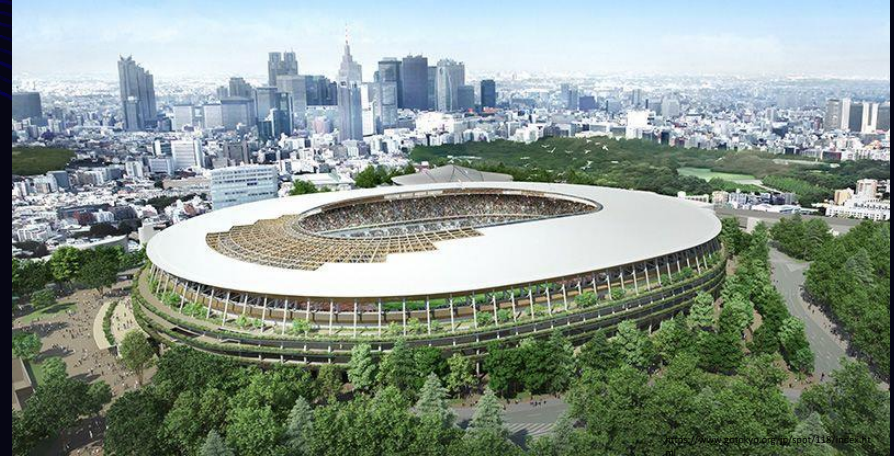

Unsustainable redevelopment of the New National Stadium and its periphery

### New National Stadium

Construction Cost : \$ 1.49 billion

Maintenance Cost : \$ 24 million / year

There is no plan to utilize the facilities after the Tokyo 2020 Games

In one case, a proposal to use an existing facility was rejected and a new temporary facility was built.

## Resources

Unsustainability of resources from procurement to disposal

# the Sustainable Procurement code

individual standards:

- wood
- agricultural products
- livestock products
- marine products
- paper
- palm oil

Some standards are not proper enough to conserve natural creatures and human rights.

# Large amount of waste caused by inflexible management

<https://news.yahoo.co.jp/byline/deru/20210828-00258373>

↑\*sample image

the surplus processed food was distributed to some food banks and stores.

Many food, uniforms and medical products are discarded without prior expectations.

Unrestrained by interests, flexible and organized planning is required to anticipate surpluses.

# Please come visit at our *Virtual Pavilion booth!!*

CYJ, which has been involved in many activities regarding the sustainability of the Olympic Games from **COP23** to **COP25**, will look back on the Tokyo 2020 Games from various perspectives

***Date : 11/12 9:30-10:00(GMT)***

***Place : Virtual Japan Pavilion Rural Area***

# Survey results on the Tokyo Olympic games 2020 and Osaka Expo 2025 from a carbon-neutrality perspective

カーボンニュートラルの観点からみた東京五輪、大阪万博についての意見収集

**Japan Youth Platform for Sustainability**

持続可能な社会のためのジャパンユースプラットフォーム

Who  
we  
are

**J.Y.P.S.**  
Japan Youth Platform for Sustainability

JYPS is a Japanese self-organized platform for the youths to engage in certain intergovernmental and allied process at local, national and international level.

JYPSは若者が地方、国、国際レベルで政府間・同盟間の意思決定のプロセスに関与するための場、プラットフォームです

**Vision:**JYPS aims for a world where equal opportunities are provided for all to reflect their opinion on different policies for a more fair and balanced society.

JYPSは社会のすべて人々が、公平に自らの意見を政策に反映させることを通じて、衡平で公正な社会が実現された世界を目指します

**Mission:**This platform aims at an open,transparent, and democratic space where youth could plan, design,implement, monitor, review and evaluate sustainable development policies.

JYPSは若者の意見を集約・調整する自治民主的な仕組みの設立、管理、そして改善をすることを通じて、若者が政府や国際的な枠組みに対しその意見を反映させることを可能にします。

To realise a sustainable society, it is essential that no one is left behind. For this to happen, we need to reflect the opinions of the youths, who are part of often marginalised community, to the process of policy decisions.

The voices of the youths here should not be a partial representation, but include as many voices as possible to maintain comprehensiveness.

JYPS considers delivering and reflecting such voices at the decision making process as one of its missions, and Today, we are here to deliver the voices of youths under 30 years of age we have collected, via surveys on SNS.

We will be presenting the results of the survey, however, JYPS does not necessarily agree to all of the voices collected.

持続可能な社会の実現のためには、誰一人取り残されない社会の実現が不可欠です。また誰一人取り残されない社会の実現のためには、周縁化されやすい人々に含まれる「若者」の意見を政策決定プロセスに反映する必要があります。この時一部の若者の声だけではなく、包摂性を保つために、より多くの若者の声を集約する必要があります。JYPSはそれらの声を意思決定の場に届け反映させることを使命の1つとしており、今回は30歳以下の若者にSNSを通して調査を行い、その意見を届けます。JYPSは調査で集められた意見に対して必ずしも同意や肯定の立場をとっているわけではなく、あくまでも調査結果としての声を公表します。

# Survey

## Theme

Tokyo Olympics games  
and Osaka Expo from  
the perspective of  
achieving carbon neutrality

カーボンニュートラルの観点からみた  
東京五輪、大阪万博

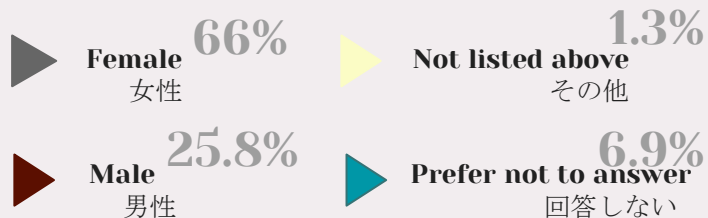

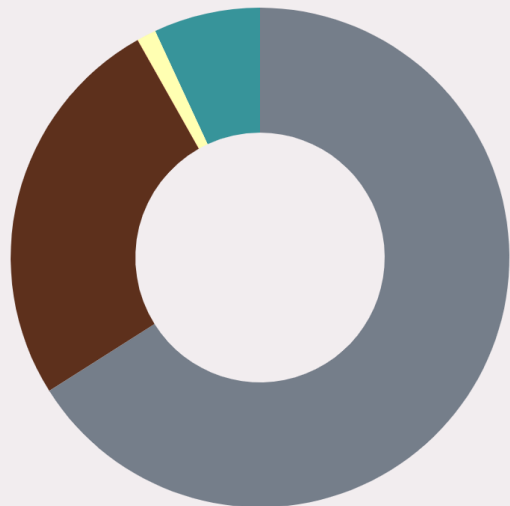

## survey period

2021/10/20  
~2021/10/22

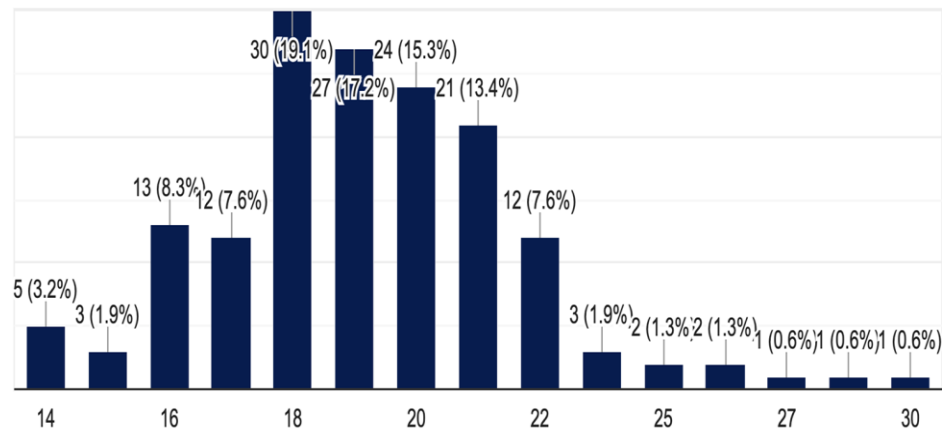

## Number of replies received

161

## Sex 性別

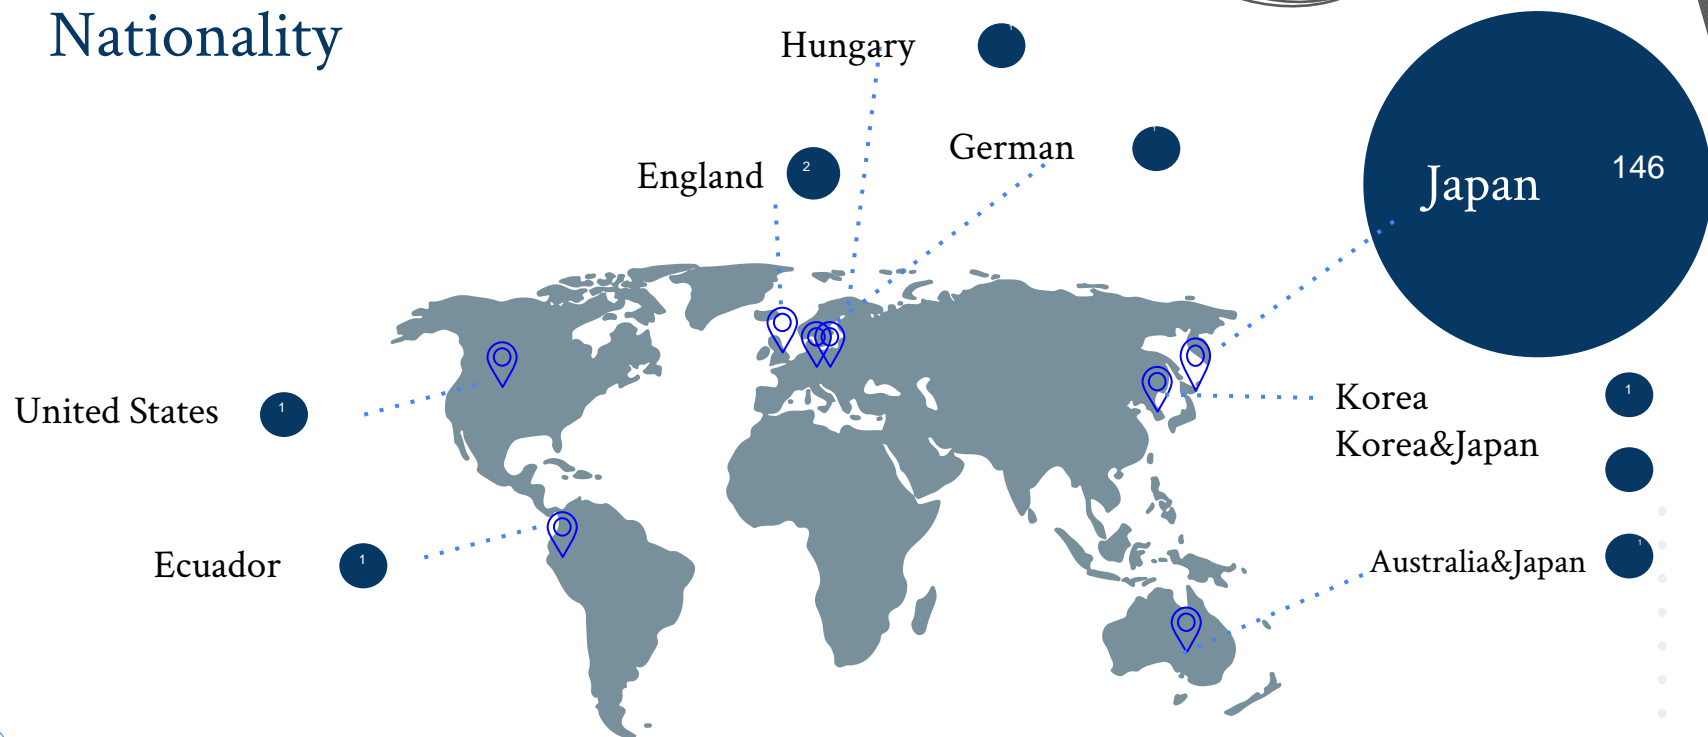

## Age 年齢

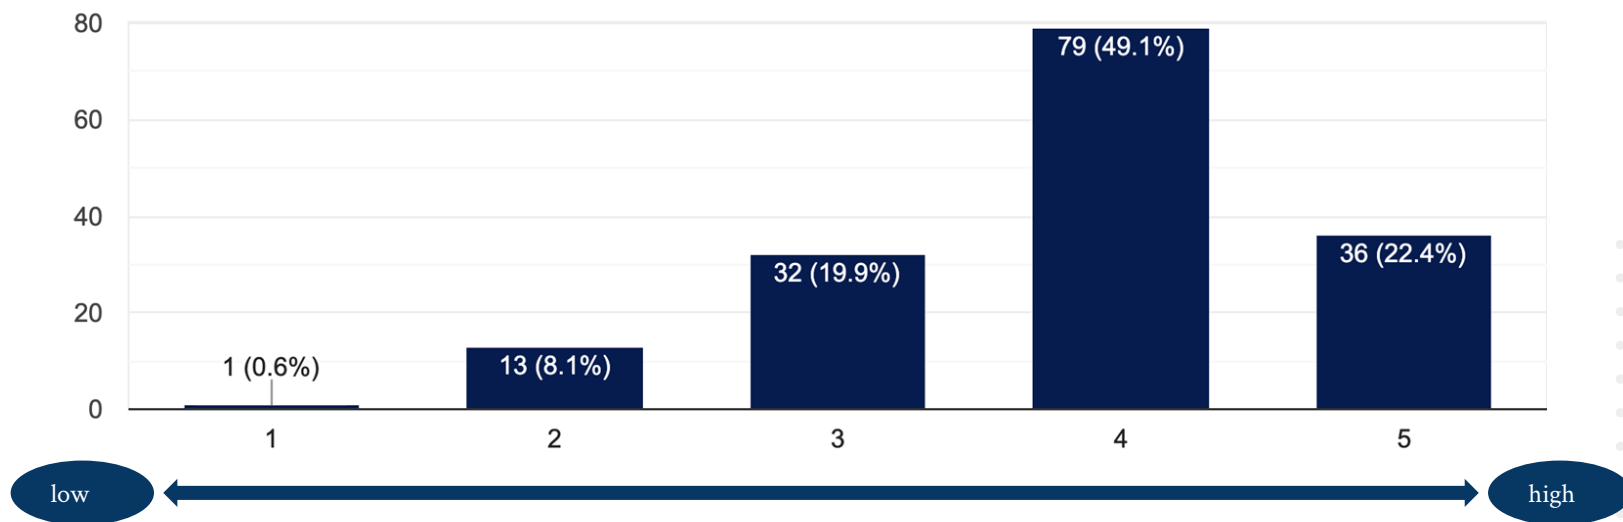

# Nationality

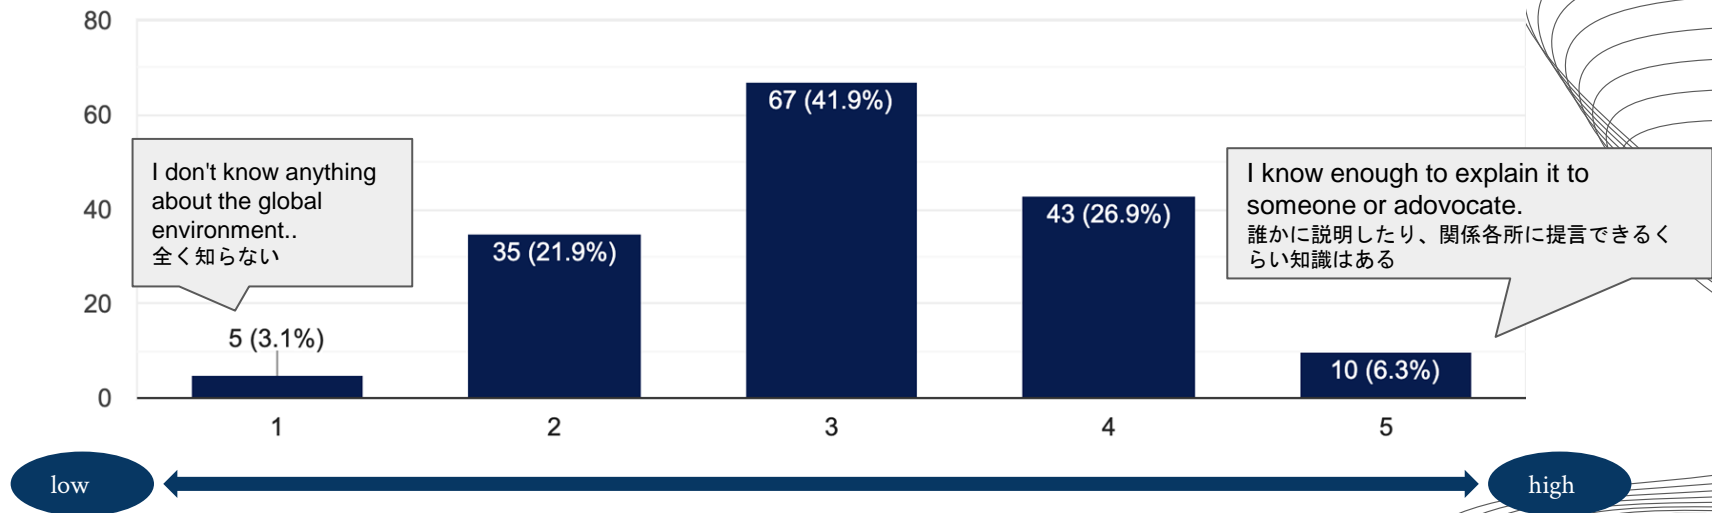

On the scale of 1 to 5, how interested are you  
in the global environment?

地球環境に関する興味関心レベル

On the scale of 1 to 5, how confident are in your knowledge on global environment?

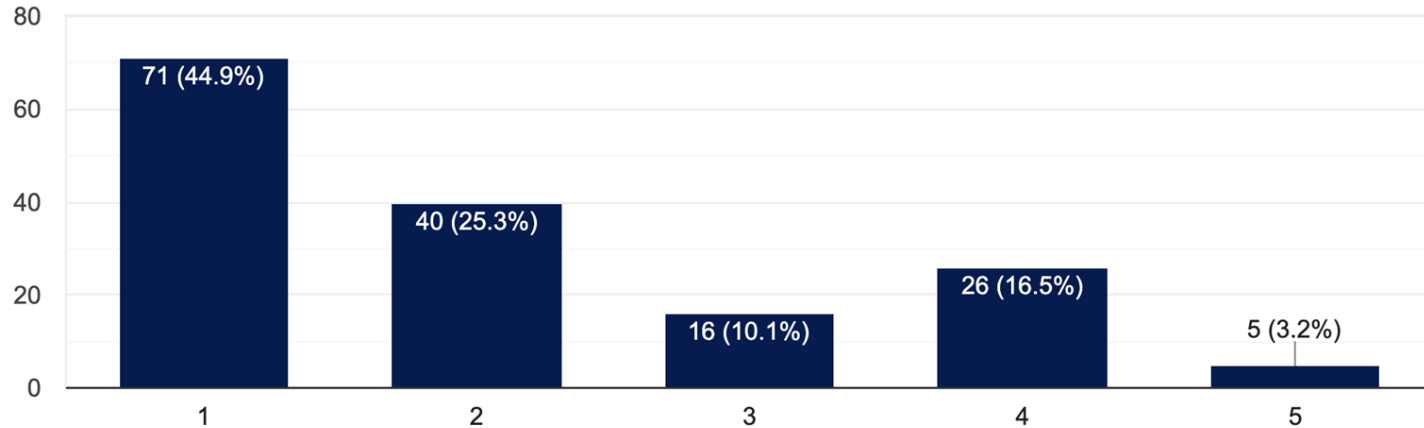

地球環境に関する知識レベル

# Were you aware about the Japanese government's plan to promote carbon neutrality in the TokyoOlympicsgame2020 and OsakaExpo2025?

東京2020大会、2025年に行われる大阪万博がカーボンニュートラルを尊重する形で企画されていたことをご存知でしたか？

I don't know

I know

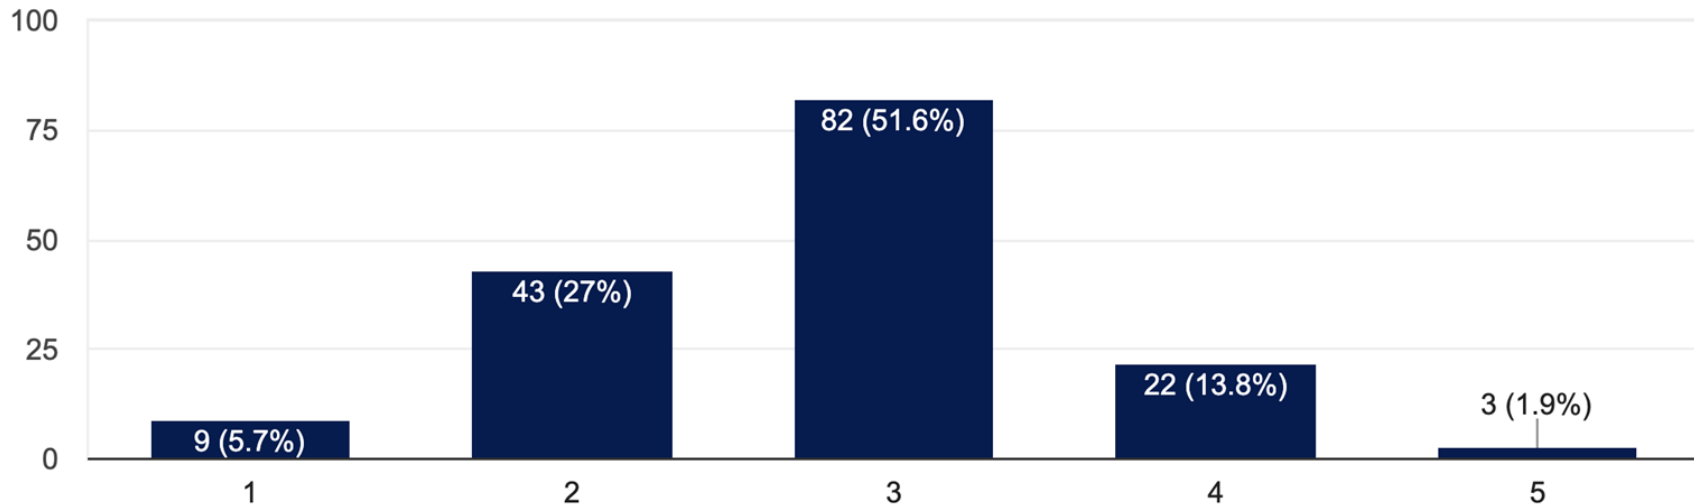

I don't think there have been any reports in the media that the Olympics or Expo are being planned in a way that respects carbon neutrality.

I didn't even know that the Olympics had the goal of respecting carbon neutrality.

# Tokyo Olympic games 2020

In terms of solving environmental issues (eg. Carbon neutrality, decarbonization), how would you rate the Tokyo Olympic games 2020? 環境問題解決（脱炭素、カーボンニュートラル）といった観点から東京五輪をどう評価しますか？

counterproductive

Evaluate  
Positively

# Positive Feedback

Because I had an impression that they implemented various measures, like the cardboard beds for the athletes. Also, I think it may have contributed to raising public awareness about solving environmental issues.選手用の段ボールベットなど、様々な取り組みをしているイメージがあったため。また、人々の環境課題解決意識を向上させるのにも役立ったのではないだろうか。

Items used were recyclable, such as using cardboard for beds. I think this would contribute to decarbonisation.ベットをダンボールにするなど、再利用できるものを使うようにしていた。これは脱炭素につながると思う。

I think there were some sustainable aspects, like the podium made of recycled materials.リサイクル素材の表彰台などサステイナブルな面もあったと思う

Sustainable mode of supplying woods  
持続可能な木材調達

I heard that torches for the relay were lit using sustainably sourced energy.  
聖火が再生可能エネルギーで点火されたと聞いた

# Food waste

Because huge amount of food waste was problematised and requires significant energy to dispose of food. Also, compared to the other olympic games, it did not even adapt to environmental issues. As an example, the majority of food served contained animal foods, which raises a question of animal welfare. 大量の食料廃棄が問題視されており、食べ物の処分にはかなりのエネルギーを要すると考えられるから。また、他国開催の大会に比べ、提供される食べ物の動物性食品の多さの点からアニマルウェルフェアの問題に加え、環境問題にも対応できていないと思う。

Seeing the issues with food waste, it made me think about the amount of CO2 emitted by burning the waste. 食品ロスとか見ると、結局廃棄物の焼却で二酸化炭素排出すると思った。

Especially food waste issues 食品廃棄の問題などの点

I think it was very wasteful to dispose of the lunch boxes. (Because burning garbage leads to CO2 emissions.) お弁当の廃棄がとてももったいなかったと思う。(ゴミを燃やすことはCO2の排出につながるの)

There were news coverage on issues with bento boxes being disposed of お弁当廃棄問題がニュースになっていた

Food waste issues were covered in the news フードロスがニュースで取り上げられていた

issues including, but not limited to, significant amount of food waste 大量の食品廃棄など

I could not understand that they have thought about the environmental impacts, as seen in the issues with hosting the game in the most humid and hot time of the season, and food waste 高温多湿の中での大会開催や、食品の廃棄問題など、環境に配慮しているように感じられなかった

Food waste as a result of lack of planning 計画性の無さから出たフードロス

# PR

I have heard about something being done about it, but **they were not advertised enough**. 何か取り組みがあったことは聞いたが、それについての十分な宣伝がなされていない

(It was) not advertised, or promoted at a **large scale**. そんなに大きく取り上げられるわけでもなく大々的にアピールしていなかった

I felt that (the games) did not have particular **focus on global environment**. 特に地球環境に配慮した、ということにフォーカスを当てていないとかんじた

I don't think there were as much media coverage on the management side's consideration for the environmental issues. I have been watching the news related to the games, but I don't remember such coverage. 運営側の環境問題への配慮についてメディアの取り上げがそこまでなかったように思う。大会についてのニュースはそこそこに見ていたが、あまり印象に残っていない。

I couldn't think of anything more than the (production process of) medals, as **measures to protecting environment**. メダル以外に特筆すべき環境保護の試みが思い当たらなかった。

I didn't get the impression that (the games) appealed (to the public) for a carbon neutral **society**. 脱炭素社会へのアピールが感じられなかった

# Management

I think the games did convey (the message by) the use of hydrogen energy such as BRT, but with shortcomings such as food waste issues as a result of lack of planning, and skyrocketing budget for the venues, I cannot say that it served as a proactive PR to the public. BRTのような水素エネルギーの利用などのアピールは伝わったが、計画性の無さから出たフードロスや天井のない競技場の予算オーバーなど至らない点もあり、世間への積極的なPRにつながったとは言えないと思った

There isn't any quantitative evaluation about the process and results of achieving carbon neutrality, which makes the games not even a stepping stone for the future generation to decarbonise and meet the goal. カーボンニュートラルのためにどのような工程を行い、結果がどうであったのかの定量的な評価が見当たらず、後世の人間がカーボンニュートラル、脱炭素を行うための参考にすならない。

Because despite there were some proactive attempt to decarbonise with installing fuel cell buses at planning phase, many other plans were scrapped in the end. If the facilities built for this Olympic games were not effectively used in the future, it can waste a lot of energy. 計画段階では燃料電池バスの普及など積極的な脱炭素への意気込みが見られたが、実現に至らなかったものも多いため。オリンピックのために作った施設を今後有効利用することができなかったら、エネルギーの無駄になってしまう可能性もある

# The Others

The medals appealed as they were made of recycled materials, but because the coating came off and other problems, I would say the quality was lacking.

メダルによる再利用アピールはあったが、塗装が剥がれたり諸々で完成度はイマイチだった

Used immense amount of electricity, and produced a lot of waste.

莫大な量の電気を使い、大量のゴミも出た

Building the infrastructure contributed a lot in damaging the environment.

インフラの整備は環境に負荷をかけた。

Saw an advert about the fuel station company while the games were streamed.

競技の放送中にガソリンスタンドの会社のCMを見た

Illegal deforestation of tropical rainforest in Malaysia

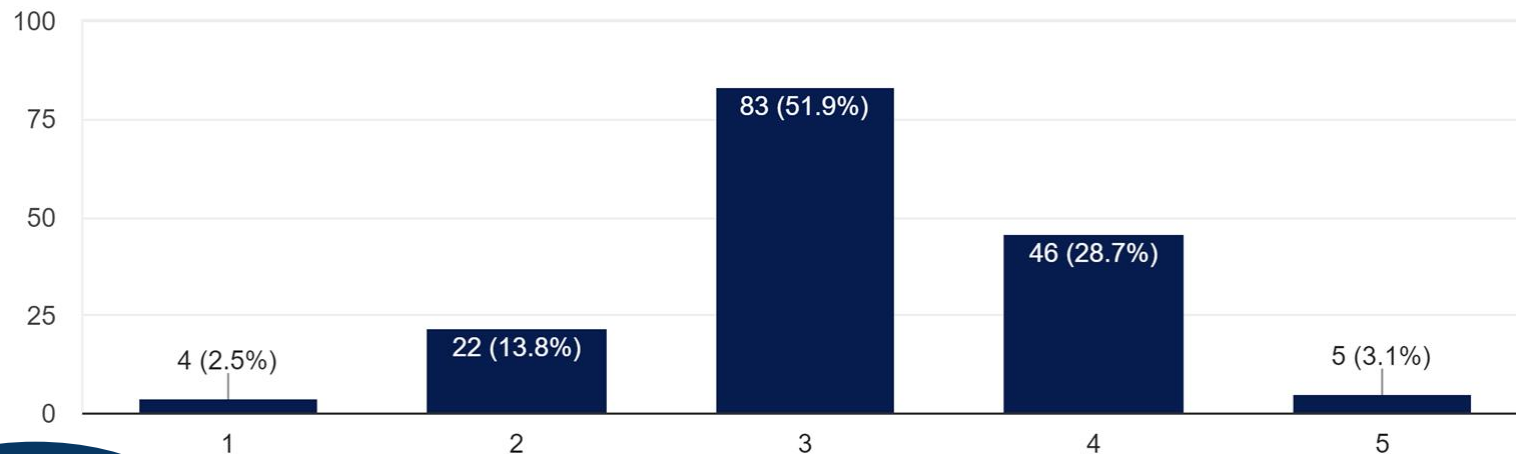

マレーシアの熱帯雨林の違法伐採

# Osaka Expo 2025

From the perspective of solving environmental issues, please rate how well the Osaka Expo would contribute.

環境課題解決（脱炭素、カーボンニュートラル）といった観点から大阪万博に対する率直なお気持ちをお聞かせください。

期待できない（否定的）  
Would not contribute

期待できる  
Would contribute well

# PR

Because I haven't heard much about Osaka Expo.

大阪万博に関する話をあまり聞いたことがないから

Because it was not advertised well enough. 大々的にアピールしていなかったから

I don't know at all about expo. 万博についてまったく知らない。

# Management/The Other

It's hard to visualise any system for evaluating the decarbonising measures taken in the process of hosting the event, and their outcome. As things stand now, it can be said that there is nothing the expo can contribute to solving the environmental problems. I could make a poem about it, but that wouldn't solve the problem, would it?

カーボンニュートラル・脱炭素のために、イベント開催過程で何を行うのか、その結果どうなったのかを定量的に評価する体制がまるで見えない。このままでは環境課題の解決に万博開催が寄与する点がないと言える。(それっぽいポエムを詠むことはできるのかもしれませんが、それでいいのか...?とは思います。)

There isn't much mention about details on how they will address environmental problems. 環境問題への配慮についての具体的記述があまり見られないから。

Because I don't think that carbon neutrality or decarbonisation would prevent the global warming in the first place. そもそもカーボンニュートラルとか脱炭素が地球温暖化防止になるとわたしは考えていないから。

# Positive Feedback

Because I think the expo lends itself better than Olympics games, to address environmental issues. スポーツの五輪より万博の方が環境問題などについてとりあげやすいと思うから。

Because I am hoping that (the expo) would serve as a role model for the world. 世界のモデルになるような展示を期待しているから。

With high hopes, and believing that (the management would) listen to the voices of the youths. 期待を込めて。若者の声を聞いてくれると信じて。

# Summary

## PR

Many were not quite aware about the topic

実はよく分かっていない、という声多数

## Assesment

They should quantify the effectiveness of activities for solving environmental issues

環境に対する取り組みの効果を数値化すべき

***To advocate for the implementation of the youths' voices***

# To Avoid Conflicts During the Olympic

Fridays For Future Sendai  
Haruhisa Tokito

# How do Japanese think Tokyo Olympic?

# Are you for/against Tokyo Olympic?

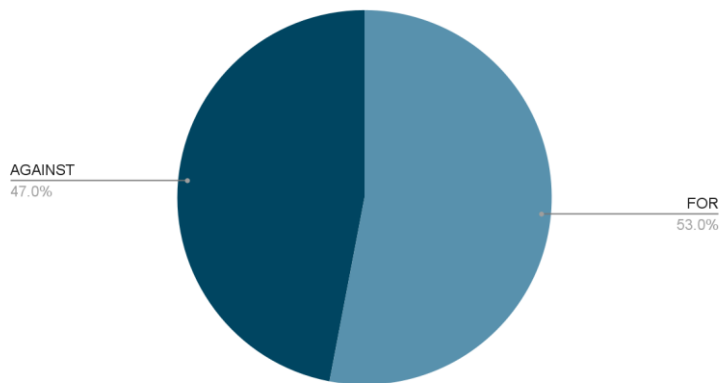

Overseas For : 53% Against : 47%

In Japan For : 78% Against : 22%

54% of Japanese were indifferent from Tokyo Olympic

※As of 13rd Jul, 2021

Points scored

<https://www.asahi.com/articles/ASP7G23PTP7FUHBI03C.html>

# Tokyo Olympic × Protests

# Petition for Tokyo Olympic

- A variety of people agreed with the petition and supporters amounted for 600 thousands.
- Reasons
  - Holding the Olympic under the COVID-19 pandemic is unreasonable since it is “the festival of PIECE”.
  - It might cause medical collapse because more people can be infected and die(The number of infectors were increasing at that time).
  - The money to put off the Olympic should be used as the other expense, e.g. social security.

# Demonstration

- About 500 people participated in the protest in front of Shinjuku sta. On 23rd Jun.
- The reason is almost the same as petition.

# Why did these actions happen?

- The difference between the idea of Japanese government/IOC and that of citizens.
  - IOC has authority of cancelling the Olympic
  - Local organizing committees were afraid of the risk and miss due to cancelling
  - It needs to be paid that huge insurance
  - The government were worry about the relation of China(the next winter Olympic)

⇒The interests between stakeholders, such as IOC, the government, and corporations and citizens intersected.

# Tokyo Olympic × Climate Action

# Tokyo Olympic × Climate Action

- The happening is related to climate change problem in Japan
  - Japanese government usually opens public comment during a conference, but does not put them into practice.
  - Also there are a few opportunities that gather people's opinions.
  - The government has a right to decide policies, takes relationship between stakeholders and other countries seriously, the cost as well.

⇒ That is why we put an ethical pressure on governments and companies.

# How to avoid in the next Olympic

# Suggestions

1. Making a process that put citizen's opinions into practice
  2. Putting emphasis on citizen's voices and moving as they demand
  3. Making Olympic more eco-friendly and sustainable
- ⇒ Be careful not to be greenwashing or make other issues

# To improve the next Olympic

- The Olympic is “Festival of Piece”
  - Focus on not only current piece but also piece in the future.
  - It should not be made the conflict between IOC/the government and citizens.
- A host country should make decisions on the basis of Olympic Charter as a delegate.

# Today's flow

**What is  
OSAKA EXPO**

- **themas**
- **aims**

- **Vision**
- **What is “Succeed EXPO”**

**Our Demand  
for  
2025**

# What is OSAKA EXPO

Introduce themes and aims

---

# 2025年日本国際博覧会 is...

(大阪・関西万博、EXPO 2025 OSAKA, KANSAI, JAPAN)

## Main Theme

Design Future Society for Our  
Lives

## Concept

-People's Living Lab-

## Sub Theme

A diverse and healthy way of life  
Sustainable socio-economic  
system

# 2025年日本国際博覧会 is...

(大阪・関西万博、EXPO 2025 OSAKA, KANSAI, JAPAN)

## EXPO 2025 OSAKA 's Aim

- **Achieved society of SDGs**
- Realization of Japan's national strategy (Society5.0)

If all this is achieved ...?

"A society where life is shining" will be a very nice society!

I am very much looking forward to seeing the "sustainable socio-economic system" by 2025 (until 2025).

Can participants dream of a bright future at EXPO?

# Opinion presentation

# Whose "life" will shine?

- Pavilion operators
- Participants
- Everyone who supports
- etc...Everyone in the world?

At least, for everyone at EXPO to “Shine”.

# Make the EXPO an Fair and Equitable opportunity

At COP26, the UK Government "provided a coronavirus vaccine."

It's important to remember that there are people in this venue who say, "I can't come even if I want to."

I think we have to help all the countries, which need the help to participate.

# Don't be an “Empty” EXPO

The theme this time is “**social design**”, not “**dream show**”.

It is not good that there is a gap between the **venue** and **reality**.

I don't want to see **theme parks**,  
I want to see the **future** at EXPO.

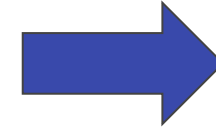

# Our Demand for 2025

# Time is a "Crisis Flooded Society"

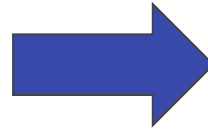

We hope that policies will be implemented **to achieve the goals before and after the OSAKA EXPO.**

<https://www.nikkan.co.jp/articles/view/00481316>

<https://www.o2.co.uk/shop/apple/iphone-13>

# Time is a "Crisis Flooded Society"

Risks are **Assumed** and **Identified**.  
From now on, **Decide** what to do  
and **Change** your mind.

It's full of **great slogans**,  
**Decide now, Act now for Future.**
